

Money

High Priest Mageson 666

September 13, 2018

WHILE I have stated about the reality of a future society. We are not there. So till that time I want to clarify there is nothing wrong with money as you need it and you deserve it. There are books that point out money is a type of substitute for spiritual power in our current materialist world. It is and this is a major understanding.

So think of your relationship to money many people don't use wisdom here. Money has created certain unconscious mentalities around it. The major mentality is money is something hard to obtain and this causes different attitudes. Something to consider is a reason for this is the current wage for labour system for many.

Sit down and ask the Gods for help on how to make money, meditate on creative ideas that by pass wage for labour like running your own business, making your own stuff and selling it online and other places. Something that allows you freedom and the ability to determine money flow. Maybe you want a better job or a promotion in your job do rituals for this do money rituals everyday, learn to witness and feel that you are a positive money magnet. Study investments and make the interest system work for you.

Find what you want to do and maybe you can do online courses or go to community college and by pass the major student debt.

In our society Money is Power and Freedom.

With our Final RTR the Jewish occult control monopoly on money control is falling apart and this will make money rituals and such have more power. Doing the Final RTR also removes the enemy curses on the Gentile soul this also relates to money.

Spiritual development will help in understanding wisdom of wealth and living. Spend your money wisely and not foolishly. Spiritual development also gives you the power of attracting wealth and living your dreams. Make money work for you not you working for money.

The symbol of Money \$ is the ancient symbol of the kundalini energy.

Use your money rituals and make it rain money.....
